

STAIN GLASS WINDOW

Materials:

1. (1) 12" x 18" black construction paper
2. (1) 12" x 18" multi-stripped tissue paper
3. a pencil and a ruler
4. scissors and paste or white glue

Steps:

1. Fold the 12" x 18" black construction paper in half, widthwise. Fold into thirds. Open so paper is just folded in half and other fold lines are visible. Fold back the end thirds.

2. Draw a cathedral shaped window on the paper. It can be one single window or three windows. Draw on a 1/2" border and designs within the window. Cut out window and designs.

3. Open and lay flat. Put glue or paste on all parts of the black construction paper and then place the 12" x 18" piece of multi-colored tissue paper on. When paste or glue is dry trim the edges, cutting away excess tissue.
